

RUSS PETER E. GARCIA

Software Engineer | Full Stack Web Developer

Pasay City | 09182467261 | russpeteregarcia@gmail.com | linkedin.com/in/russ-peter-garcia-87474b387 | russgarcia.dev

SUMMARY

Results-driven with software engineering internship and project experience spanning full stack and backend development using Next.js, Laravel, Node.js, and Python. Built and deployed production-grade systems — including a fleet intelligence platform (CMS + PWA) at a technology startup — and demonstrated strong adaptability by migrating codebases to professional engineering standards. Proficient in RESTful API design, relational databases (PostgreSQL, MySQL, Supabase), and cloud deployment. Combines engineering precision with elected leadership experience and a proven capacity for independent, self-directed problem solving.

PROFESSIONAL EXPERIENCE

Asceoft Inc.

2026

Software Engineer Intern | Fleet Intelligence System (FIS) | React · Express · PostgreSQL · PWA

- Conducted technical research and architected the initial backend and frontend of the Fleet Intelligence System (FIS) from the ground up, covering core data models, API design, and CMS structure.
- Extended the FIS to a Progressive Web App (PWA), delivering a cross-platform, offline-capable interface on top of the existing web application.
- Led a full codebase migration, transitioning self-researched architecture to Asceoft's internal engineering standards; studied existing company codebase and applied feedback from supervisors to ensure long-term maintainability.
- Operated with a high degree of autonomy across both backend and frontend responsibilities, demonstrating independent problem-solving and the ability to own end-to-end feature delivery in a startup environment.

CLIENT WORK

Steve Hummer Homes LLC — Real Estate Marketing Site

2026

Next.js · React · Supabase | stevehummerhomesllc.com

- Developed a conversion-optimized marketing site for a real estate client utilizing Next.js 16 and React 19.

The Beacon — School Publication CMS

2025 - 2026

Next.js · Express · Supabase | the-beacon-gules.vercel.app

- Architected a dynamic content management system for a school publication board, streamlining the editorial workflow from article drafting to multi-stage review and final approval.
- Implemented Role-Based Access Control (RBAC) to manage granular permissions across writer, editor, and admin roles, ensuring secure and structured data handling.

PROJECTS

REcipe — AI-Powered Food Inventory Mobile App

2025 – 2026

Capstone Project | React Native · Python · Supabase

- Engineered a mobile application that uses AI-powered image recognition to automate food inventory tracking and reduce household food waste.
- Integrated expiration date notification systems and an algorithmic recipe generator that surfaces meal suggestions based on available pantry ingredients.
- Delivered end-to-end mobile solution handling data ingestion, backend logic, and real-time database sync via Supabase; awarded 1st Runner-Up, Best Capstone Project at Research Colloquium.

Payroll System — World Odyssey Forwarders Inc.

2024

Academic Project | PHP · Vue.js · MySQL

- Designed and built a secure payroll automation system that streamlined salary computation, attendance tracking, and mandatory deductions for company employees.
- Developed a responsive Vue.js dashboard to visualize payroll data, achieving 100% accuracy in net pay and deductions calculations.

- Implemented role-based authentication to restrict payroll data access to authorized personnel only.

Pawrfect Home — Pet Adoption Platform

2024

Academic Project | React.js · Supabase

- Built a full-stack pet adoption platform connecting animal shelters with prospective adopters, improving match rates through improved UI/UX and search filtering.

EDUCATION

University of Santo Tomas — Manila

2022 – 2026

Bachelor of Science in Information Technology | Dean's Lister (A.Y. 2024–2025)

University of Santo Tomas — Manila

2019 – 2021

Bachelor of Science in Civil Engineering | Dean's Lister (A.Y. 2019–2021)

LEADERSHIP EXPERIENCE

Sangguniang Kabataan — Kagawad (Elected Official)

2023 – Present

Barangay 111, Pasay City

- Lead formulation of youth-centric resolutions and manage budget allocation for community development projects at the barangay level.

Executive Coordinator, Catechetical Section

2024 – 2025

UST PAX Romana – ICS Unit, Manila

- Orchestrated strategic planning for unit-wide spiritual formation sessions; served as primary liaison between the executive board and operational committees.

Team Leader, Socio-cultural Marketing

2022 – 2023

UST Society of Information Technology Enthusiasts (SITE), Manila

- Secured strategic corporate partnerships and negotiated MOAs to fund organization-wide events.

TECHNICAL SKILLS

Languages:	C#, PHP, JavaScript (ES6+), TypeScript, Python, Java, Kotlin
Frontend:	React.js, Next.js, Vue.js, React Native, Tailwind CSS, PWA, HTML5, CSS3
Backend:	Node.js, Laravel, RESTful API Design, Supabase, Firebase, OAuth, JWT
Databases:	PostgreSQL, MySQL, Supabase, Relational Database Design
Tools & Platforms:	Git, GitHub, Docker, Postman, Vercel, Android Studio, Figma
Concepts:	RBAC, MVC Architecture, Agile/Scrum, CI/CD, Code Standards, Responsive Design

CERTIFICATIONS & ACHIEVEMENTS

- Information Technology Passport (IT Passport) — Certificate #IP4500084, October 2025
- Dean's Lister — UST, College of Information Technology (A.Y. 2024–2025)
- Dean's Lister — UST, College of Engineering (A.Y. 2019–2021)
